

Net Neutrality is a part of our freedom. We should not be subject to pay for what large corporations wish to do with the internet. This puts small businesses and middle to lower class individuals and families at risk of money lost and loss of access to something they have the right to.

Net neutrality is also an important part of the reason why the internet and its development in the United States has been so successful. Eliminating it will hurt or possibly destroy a large segment of our economy.

Please keep net neutrality.

Sincerely,

Concerned citizens
